

Ensure Business Continuity WITH RESILIENCY-AS-A-SERVICE

The Enchanted Rock Resiliency-as-a-Service solution helps facilities reinvent how they approach electrical resiliency.

We provide fully managed clean, natural gas-powered resiliency microgrids, support services, and flexible pricing options designed for fast, simple, and worry-free protection from extended grid outages.

FOCUS ON YOUR BUSINESS, LEAVE RESILIENCY TO US

Enterprises nationwide are increasingly recognizing the value of always-on electricity—and are acutely aware of the physical, financial and reputational hazards they face if the power goes out.

With our fully managed and sustainable microgrids, Enchanted Rock has reimagined the way companies ensure business continuity in the face of grid failure. Coupled with comprehensive support services and flexible pricing, our team of experts designs, installs, operates and maintains purpose-built systems that enable worry-free protection from extended electrical outages.

GAINED BENEFITS

270+

Operational Microgrid Sites

Eliminate costly inventory loss due to power outages

565+

MW Commissioned

Maintain secure, uninterrupted operations

260+

MW Under Construction

Reduce CapEx and OpEx with a fully managed end-to-end microgrid

99.999%+

Combine Reliability

DECARBONIZED RESILIENCE

Enchanted Rock utilizes natural gas fuel to power our resiliency solution due to the plethora of benefits, including low sound levels, compact footprint, ultra-low emissions, and indefinite runtime. Our patented technologies result in the cleanest local emissions available for long duration outage protection. Plus, our solution supports a better tomorrow by helping balance intermittent renewables and furthering the integration of green energy.

WHY NATURAL GAS?

- Ultra-low sound levels
- Compact footprint
- 10X Lower local emissions than diesel alternatives
- Underground infrastructure remains unaffected by weather events and power disturbances

TURNKEY RELIABILITY BY DESIGN

Enchanted Rock's dual purpose microgrids quick-start backup powers entire facilities in a matter of seconds to ensure service is running at the highest possible level. Enchanted Rock utilizes a "run often, run loaded" approach instead of only running during emergencies. Often we run to provide grid support services to the local utility.

This minimizes the potential for an operational surprise by providing constant testing and conditioning to the system. Enchanted Rock owns, operates, and maintains the system utilizing our 24/7 Microgrid Network Operations Center (mNOC) to ensure operational integrity. This full, turnkey service allows critical infrastructure facilities to focus on their core business - providing high-quality services to their customers.

DUAL PURPOSE MICROGRIDS, AN AFFORDABLE ALTERNATIVE

Enchanted Rock's Dual Purpose Microgrids offer dependable backup power at a fraction of the cost of comparable diesel backup. When facilities don't require backup power, Enchanted Rock participates in energy markets by providing grid support services. This additional revenue offsets the cost of the system to the customer.
